

PRESS RELEASE

FOR IMMEDIATE RELEASE

Part #: 56815

Description: Mustang Rear Sway Bar

MSRP: \$290.50

Application: 2015 Ford Mustang (all engines)

This new Hellwig rear sway bar for the 2015 Ford Mustang stiffens the roll rate of the vehicle for better handling and performance and is designed to work with the Hellwig front sway bar (P/N 56715). This bar is made from 1" 1026 DOM to minimize the weight while not taking anything away from performance. It is designed to work on both track cars and daily drivers and has 3 hole adjustment in the forged bar ends allowing it to be tuned to your driving style. The Hellwig sway bar replaces the factory sway bar, installing in the same location, and only requires basic hand tools. This bar fits on all the engine options available for the Mustang. There is no drilling or welding required.

Product Attributes:

Polyurethane bushings

1" 1026 DOM

Powdercoated heavy duty components

Made in the USA

Lifetime warranty
